Experience

AI Engineer | Synesis IT PLC – Dhaka, Bangladesh June 2026 – Present

- Researched and implemented optimization techniques for Small Language Models (SLMs) and Large Language Models (LLMs), including quantization, to improve inference speed, reduce model size, and increase deployment efficiency.
- Designed and integrated AI-driven features into Convay, an online meeting platform, leveraging LLMs to deliver intelligent meeting experiences and productivity enhancements.

Machine Learning Engineer | Giga Tech Limited – Dhaka, Bangladesh September 2024 – June 2026

- Designed and implemented an AI-powered web crawler to extract both structured and unstructured data from heterogeneous websites using adaptive parsing and LLM-based content understanding.
- Developed an agentic RAG-based HR chatbot that automated 90% of employee query resolution across multiple internal systems, including SQL databases and vector stores. Built using open-source LLMs to enable scalable and context-aware responses.
- Trained and fine-tuned Bangla language models (BERT, GPT, T5, LLaMA) using large-scale in-house corpora, focusing on improving linguistic coverage and domain adaptation. Optimized training pipelines for efficient pretraining and downstream task transfer.
- Improved NLP models for NER, POS tagging, and question answering, improving task performance by up to 7.14% over baseline systems. Applied feature engineering and fine-tuning strategies to enhance robustness and accuracy.

Trainee Software Engineer | Syntax Solution Limited – Dhaka, Bangladesh June 2024 – August 2024

- Participated in the development of a recommendation engine, achieving a 25% enhancement by substituting a keyword search methodology with a hybrid architecture that integrates semantic similarity with keyword-based techniques.
- Enhanced customer interaction by around 37% by implementing a Retrieval Augmented Generation powered chatbot pipeline to automate repetitive queries.

Education

Bachelor of Science | **World University of Bangladesh** January 2020 – April 2024

- **Major:** Computer Science and Engineering
- **Coursework:** Data Structure, Algorithms, OOP, Statistics, Algebra, Calculus, Data Mining, Neural Networks, System Design.
- **Thesis:** “Advancement in Neuroimaging: Automated Identification of Brain Strokes through Machine Learning.”

Publications

- **BanSuite: A Unified Toolkit and Software Platform for Low-Resource NLP in Bangla.** *ACL 2026.* [Link](#)
Md Abu Sayed, Faisal Ahamed Khan, Jannatul Ferdous Tuli, Nabeel Mohammed, Mohammad Ruhul Amin, Mohammad Mamun Or Rashid.

Projects

Corpus [Link](#)

- I was one of the core contributors to this large-scale unified NLP platform, focusing on corpus development, syntactic annotation, low-resource language models, and downstream tasks for Bangla NLP researchers.

Onecrawler [Link](#)

- An async Python crawling framework for discovering URLs, extracting links, and scraping structured content. Onecrawler provides shared configuration, browser-based extraction, sitemap discovery, and optional GenAI-powered structured outputs for maintainable crawling workflows.

Sentiment Analyzer [Link](#)

- A comprehensive AI-powered sentiment analysis platform that processes multiple content types, including text, audio, documents, and web URLs. Built with modern technologies for scalable, multilingual content analysis.

ChatDocs [Link](#)

- Built a RAG-powered agentic application that automatically retrieves and synthesizes information from structured and unstructured data sources to provide accurate answers.

Technologies

AI/ML: PyTorch, LangChain, LangGraph, TensorFlow, Keras, Scikit-Learn, Pandas, Lightning, Transformers, NumPy, Onnx, Matplotlib, Seaborn, VectorDBs, HuggingFace, Weight & Bias, vLLM, Ollama, Nvidia Triton, LitServe, Prefect.

Backend/Ops: Python, FastAPI, Docker, PostgreSQL, MongoDB, JWT Authentication, Redis, Celery, Elasticsearch, CI/CD.

Certifications

- Generative AI with Large Language Models | DeepLearning.AI | AWS | Coursera [Link](#)
- Machine Learning Specialization | DeepLearning.AI | Stanford University | Coursera [Link](#)
