ABOUT ME

I am an AI/ML Engineer with a foundational background in AI/ML and software engineering, focused on developing AI applications. Skilled in ML system design, I am preparing for a master's degree to deepen my expertise and build scalable solutions for the AI community.

WORK EXPERIENCE

🏢 **Synesis IT PLC** – Dhaka, Bangladesh

AI Engineer

[07/06/2026 – Current]

- Researched and implemented optimization techniques for Small Language Models (SLMs) and Large Language Models (LLMs), including quantization, to improve inference speed, reduce model size, and increase deployment efficiency.
- Designed and integrated AI-driven features into Convay, an online meeting platform, leveraging LLMs to deliver intelligent meeting experiences and productivity enhancements.

🏢 **Giga Tech Limited** – Dhaka, Bangladesh

Machine Learning Engineer

[10/09/2024 – 04/06/2026]

- Designed and implemented an AI-powered web crawler to extract both structured and unstructured data from heterogeneous websites using adaptive parsing and LLM-based content understanding.
- Developed an agentic RAG-based HR chatbot that automated 90% of employee query resolution across multiple databases (SQL, VectorDB) using open-source LLMs.
- Pretrained and fine-tuned Bangla language models (BERT, GPT, T5, LLaMA) on in-house corpora, improving key NLP task performance: NER (+7.14%), POS tagging (+4.64%), and QA (+5.00%).

🏢 **Syntax Solution Limited** – Dhaka, Bangladesh

Trainee Software Engineer

[01/07/2024 – 31/08/2024]

- Participated in the development of a recommendation engine, achieving a 25% enhancement by substituting a keyword search methodology with a hybrid architecture that integrates semantic similarity with keyword-based techniques.
- Improved customer interaction by around 37% by implementing a Retrieval Augmented Generation-powered chatbot pipeline to automate repetitive queries.

EDUCATION AND TRAINING

Bachelor of Science

World University of Bangladesh [11/01/2020 – 16/04/2024]

City: Dhaka | Country: Bangladesh | Website: [wub.edu.bd](https://www.wub.edu.bd) | Field(s) of study: Computer Science and Engineering | Final grade: 2.73 | Thesis: Automated Identification of Brain Strokes through Machine Learning

SKILLS

Python / PyTorch / Transformers / Pandas / NumPy / HuggingFace / Weight & Bias / vLLM / Scikit-Learn / FastAPI / Docker / PostgreSQL / MongoDB / VectorDB / ONNX / Lightning / LitServe / Nvidia Triton / Redis / JWT Authentication / MLOPS / Backend

PUBLICATIONS

[2026]

BanSuite: A Unified Toolkit and Software Platform for Low-Resource NLP in Bangla Developed a comprehensive Bangla NLP platform integrating POS tagging, NER, shallow parsing, and dependency parsing using a large manually annotated treebank. Achieved strong performance ($\approx 90\%$ F1/UAS) and delivered accessible tools via a Python toolkit and web application, outperforming existing Bangla NLP systems and multilingual LLMs.

Authors: Md Abu Sayed, Faisal Ahamed Khan, Jannatul Ferdous Tuli, Nabeel Mohammed, Mohammad Ruhul Amin, Mohammad Mamun Or Rashid | **Journal Name:** The 19th Conference of the European Chapter of the Association for Computational Linguistics | **Publisher:** Association for Computational Linguistics (ACL)

PROJECTS

OneCrawler Async Python crawling library with sitemap discovery, browser-based extraction, and LLM-powered structured output — one Settings object drives it all.

Link: github.com/sayedshaun/onecrawler

Corpus I was one of the core contributors to this large-scale unified NLP platform, focusing on corpus development, syntactic annotation, low-resource language models, and downstream tasks for Bangla NLP researchers.

Link: corpus.bangla.gov.bd

LangTrain A Pytorch back boned Python package for rapid language model development, supporting humongous data tokenization, distributed training, and evaluation.

Link: github.com/sayedshaun/langtrain

WSD Implemented a dual-architecture pipeline for training and evaluating state-of-the-art Word Sense Disambiguation models, with available pretrained weights for quick deployment.

HOBBIES AND INTERESTS

Sports Event I enjoy playing both cricket and football, as they not only provide excitement and challenge but also help me develop teamwork, discipline, and strategic thinking. Being part of these sports fosters collaboration, resilience, and a strong sense of camaraderie.

Social Work Interested in community service and volunteering activities that create meaningful social impact. I enjoy contributing my time and effort to causes that support others, foster positive change, and strengthen connections within the community.

CERTIFICATIONS

[DeepLearning.AI | AWS | Coursera]

Generative AI with Large Language Models Acquired knowledge of Generative AI use cases, project lifecycles, model pre-training, Quantization, Lora, fine-tuning, evaluation, and application development with open-source Large Language Models.

[IBM | Coursera]

Data Visualization with Python Learned and applied various data visualization techniques by representing data through bar charts, scatter plots, distribution plots, histograms, heatmaps, pie charts, and box plots to effectively analyze the data.

[DeepLearning.AI | Stanford University | Coursera]

Machine Learning Specialization After completing this course, I gained knowledge of tensor operations, gradient descent, perceptron, supervised and unsupervised learning, ensemble methods, recommender systems, and reinforcement learning.

[DeepLearning.AI | Coursera]

Linear Algebra for Machine Learning and Data Science I acquired expertise in linear algebra, including Eigenvalues, Eigenvectors, Linear Equations, Determinants, and their application in Machine Learning.

[University of London | Coursera]

Finding Your Professional Voice: Confidence & Impact I gained knowledge in enhancing communication skills, enabling clear, confident expression, and fostering meaningful connections with audiences through improved vocal techniques
